

Dr. W. David Menzie

**Chief of Global Minerals Analysis, National Minerals Information Center
U.S. Geological Survey**

W. David Menzie is Chief of Global Minerals Analysis, National Minerals Information Center at the U.S. Geological Survey (USGS) in Reston, VA. He is responsible for USGS reporting on mineral production and consumption of more than 180 countries and 50 U.S. States (Volumes II and III of Minerals Yearbook). In addition, Dr. Menzie manages USGS materials flow studies. During his career he has conducted research on a variety of topics in economic geology, including mineral deposit modeling and methods of mineral-resource assessment. He is a fellow of the Society of Economic Geologists; a member of the Society for Mining, Metallurgy, and Exploration (SME); the American Statistical Association; and Sigma Xi. He has received the Department of the Interior's Meritorious Service Award, is a Centennial Fellow of Penn State's College of Earth and Mineral Sciences, and was a Metzger Conway Fellow at Dickinson College. He holds a B.S. with honors in Geology from Dickinson College, a M.A. in Statistics, and a M.S. and Ph.D. in Geology from The Pennsylvania State University and studied Business Administration at the University of Santa Clara.
